

UNIFIED REMOTE

**Easily the most featured-filled PC remote control solution.
Turn your smartphone into a wireless universal remote control for your PC.**

ONE APP

Unified Remote gives you complete control from all your devices, with one common familiar design. The app is now available for iPhone, iPad, iPod Touch, Android, and Windows Phone.

ALL YOUR DEVICES

Unified Remote supports a wide range of platforms, including Windows, Mac, Linux, and even embedded systems such as Raspberry Pi and Arduino Yún. But we're not stopping there. We are continuously adding support for more platforms and devices.

ALL YOUR PROGRAMS

Unified Remote comes preloaded with remotes for 70+ programs across various operating systems, including mouse/keyboard, media players, photo viewers, streaming sites, etc.
